UNIGOLD delivers school supplies by community and sectors most in need

Restauración, Dajabón.- Annually the large mining company plans and coordinates the delivery of basic school equipment, containing materials for each of the students of the educational levels, in public schools.

This initiative seeks to help the conditions so that children and adolescents can attend educational centers without missing the basic materials necessary for their school day, hoping that the endowment will allow them an adequate use of their comprehensive training, contributing in this way with the development of their potentialities.

With the delivery of these school supplies, UNIGOLD supported around 800 students and low-income sectors have benefited for the start of the new academic year. This initiative contributes to guaranteeing student attendance at the educational center, while supporting the family economy.

The distribution of school supplies is part of the commitments assumed by UNIGOLD with the Restoration community in order to promote the teaching-learning process, its beneficiaries being students from public educational centers and their families, helping with the burden that represents annually the purchase of materials.

In Villa Anacaona, the community neighboring the company's operations, school supplies were delivered individually from house to house, thus guaranteeing that all students in that community were benefited.

About Unigold Inc.-

Unigold is a Canadian junior natural resources and mineral exploration company listed on the TSX Venture Exchange under the symbol UGD, growth oriented, focused on the exploration and development of its gold projects in the Dominican Republic, a highly prospective country for the gold and polymetallic mineralization.
